SKILLS

- Programming
- Web Development
- DS & LINUX (BASIC)

PROGRAMMING LANGUAGE

- C Programming
- Frontend (HTML ,CSS ,JS)
- Java (Basic)
- Node JS
- React JS

EDUCATION

- **Velammal Vidyalaya 2018-2020**
  Second Group - Computer Science with Maths (Precentage - 89%)

- **St Joseph's College Of Engineering Present (3rd Year)**
  Bachelors Degree In Computer Science (CGPA - 8.86)

CAREER OBJECTIVE

An energetic and passionate college student with excellent analytics skills and a fast learner, working towards a Bachelor's degree in Computer Science at St. Joseph College. I've worked with my student group and have done a few self-thought projects using React JS and Node JS, which is available in my GitHub profile. I look forward to using my knowledge at my best fulfilling the requirements .

PROJECTS

- Recipe Book Using Meal-DB API
- Movie Spot Static Ott Site Using Frontend and Express.js
- Blood Bank Management Using MERN Stack
- Temple Explorer Using Node.js
- Created many customized Rest API's
- Application for Symposium Event

ACHIEVEMENTS

Smart India Hackathon Winners 2022
My team of 7 people made a website for a concept career dendrogram (AICTE problem statement) and won the 1st prize for it out of 29 teams that participated in the competition.
It was amazing to meet, greet and interact with diverse people from different states for the competition. The requirement of this competition is all about giving solution through software or hardware for various government-aided companies.

Event Organizer 2023
I was part of a dedicated team that organized a college symposium event. We successfully conducted two rounds, "Reverse Coding" and "Maze Coding", which attracted over 70+ teams comprising students from 26 different colleges. Our ability to manage diverse knowledge and skills was crucial to the event's success.
